Experience & Knowledge in Finance & Business Intelligence as a high-end Project Leader + Entrepreneurial and business oriented MBA Spirit + International exposure

Management consulting offering an helicopter view of all aspects of the company

Work Experience

09/'04->08/'09

Just BI IT

Paris, France

Open Source Software Solutions - Managing Director

- Implementation of a Business Plan to set up services (Audit, Training, Installation, Programming, Implementation, Consulting and Support) to Schools, Start-up, SoHo, SME to reduce the IT total cost of ownership.

01/'03->08/'04

Siemens SAS : Business Analyst

Paris, France

Information Systems - Financial Direction

- Implementation of an Information System Tool which now has more than 100 users a day. As a MIS project leader, I wrote specifications, developed, tested, implemented and trained employees for each central service (Sales Procurement and Logistic, Financial Direction, HR...).
- Customised and set up the Information platform required by functional individuals and outsourced to Siemens Business Services and finally trained 30 key users from the Financial Direction department.
- Data Warehouse Informatics correspondent providing a drilled down report of global financial information to individual responsibility centres through a controlling/profit analysis cube (enabling sales and profit analysis by orders, managers, sellers, divisions, time and 12 others analysis axes), an account payable (including aged customer balances), an account receivable, a cash flow forecasting and a credit management tool.

06/'01->12/'03

Siemens SAS : Controller

Paris, France

Controlling Team - Financial Direction

- Directly reported to the CFO, helping controllers to finalize quarterly financial meetings in München together with monthly Executive's committees, Enterprise committees, KPMG meetings, internal audit presentation, etc. Implemented a spreadsheet macros program that freed up company resources and reduce the time required for company committee presentations by 3.
- Centralized and coordinated general internal financial communications. Conceived databases from the data collection to the practical application in order to minimize time consumption of future queries.
- Recommended and initiated a project of archiving bills on an electronic format, now used by the Account Receivable share services, the project saved tenths of square meters in Paris's offices.
